The Ultimate Google Icons Pack: 100+ Scalable SVGs

After years of digging through scattered assets, I decided to build a complete (as for 2025) set of Google app and service icons. This pack includes 114 icons, covering everything from the most popular products like Gmail, Maps, YouTube, and Drive, to niche ones like FeedBurner, ARCore, and Google Groups, all in scalable SVG format.

Every icon is faithful to Google's brand colours, making them perfect for UI kits, mockups, dashboards, and presentations.

I've also added the latest gradient versions of Google Search, Gemini and Google Home icons and they are rendered properly in Illustrator and Figma (unlike the ones you grab from official sites)

Some icons, like Gboard and FeedBurner, were completely redrawn from scratch because no proper vector versions existed.

If you've ever wasted time hunting for missing Google logos or resizing low-res PNGs, this pack will save you hours.
